SUMMARY

Java Developer with hands-on experience in building scalable web applications using Java (Spring Boot, Hibernate), REST APIs, React, and MySQL. Skilled in full-stack development, responsive UI, and backend optimization. Passionate about problem-solving and delivering efficient, maintainable code.

PROJECTS

E-Ticket Booking Website (Active Development)

Technologies: Java (Spring Boot, REST APIs, Hibernate, Maven), React, MySQL, Stripe, Git

- Developed RESTful APIs using Spring Boot for Ticket Booking and user modules, enabling efficient CRUD operations and authentication.
- Built a modern React frontend, achieving a 30% faster load time via lazy loading and Webpack code splitting.
- Optimized MySQL queries through indexing and caching, improving query execution time by 20% and reducing server load.
- Integrated Stripe API for secure payment processing with real-time confirmation and validation.
- Collaborated using Git for version control and contributed to a scalable codebase with CI-ready structure.
